

I just wanted to let you know that I listen to K-Love morning, evening and during the night and week-ends. It serves me with a certain strength I would not have without it. The effect on our community would be awful. Without this radio station in the area all we would have is the hard rock and other types of music which do not work with the public and have a me only attitude and the children wouldn't have a choice but to listen. This gives them and me and everyone a choice that we should have. Not everyone likes the alternative type of music and that goes with the freedom of choice and a calming influence on a lot of people. I believe that since K-Love has been on the air that life is a whole lot less stressful for me and I would not have that if it wasn't on the air the whole day. Give us K-Love Radio Station who provides news in a truer way than CNN or the other news does and someone for a support group that others do not provide.....
